OCCUPATION Farmer

Hey there!

My name is Alanna Nafziger and I'm running for Cache Water District Seat #3 to enact real change with lasting benefits. I'm going to I'm deeply rooted here in Cache Valley and I care about my community. I act on that every time I can and want to expand whos at the table in decisions about how we use and value water in the Valley.

I have a master's degree in landscape architecture and am trained in living systems thinking and design. I believe the way we treat our water systems matters deeply to quality of life here in Cache Valley. The complex water issues presented by drought, flooding, human consumption, aging infrastructure and storm water management deserve intentional solutions that foundationally integrate ecology and well being. We deserve to have officials who work to understand how solutions to these issues fit within our community, our bioregion, and the Great Salt Lake watershed.

If elected I would work with others towards holistic solutions, strengthening water conservation and river restoration, while pioneering frameworks and policy that keep waterways open and flowing.

I would love to have your vote.
