CITY OF RESIDENCE Hyde Park

YEARS OF RESIDENCE 4

AGE 41

OCCUPATION University Educator

I am an irrigation engineer with over 17 years of professional experience in agricultural water management and water resources engineering. I am dedicated to the mission of the Cache Water District to protect and manage Cache County's water resources and provide future water planning. We live in a time of increasing pressures on our water that will require responsible use and cooperation from all residents. We must also provide a strong voice as the county works within our state and watersheds to provide the best conditions for our future generations. I, like all Cache County residents, am the benefactor of the cooperation and grit of so many who have come before us. We have a duty now in our moment to work together to preserve our farms, communities, and natural systems for our children and those who follow after them. I would be honored to serve Cache County in this effort.
